DETAILED ACTION

1. Claims 1-18 are pending in the present application.

Drawings

2. The drawings were received on October 23, 2003. These drawings are approved.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the first database and second database must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed,

had possession of the claimed invention. Regarding the limitation "first database" and "second database" these terms are not used in the disclosure nor the drawings note figure 5A. In the disclosure Applicant refers to a source database and a target database see page 15. Also, Applicant has not defined the limitation "set of dependencies". Applicant refers to the dependencies among the tables at page 18 line 31 through page 19 line 7; but does not appear to refer to a set of dependencies or define what is meant by the term. The disclosure does not appear to describe how are the set of dependencies determined?

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: the migration process implemented by database migratory 510 figure 5A.

Response to Arguments

7. Applicant's arguments filed October 23, 2003 have been fully considered but they are not persuasive. In the response Applicant argued the rejection cited under 35 USC 112 second paragraph is traversed because the use of the terms "first database" and "second database" used in the claims are adjectives that merely distinguish one entity from another entity. The specification uses the term source database and target database. In response to Applicant's argument the examiner respectfully maintains the rejection. The specification including the drawings does not mention a first database and/or a second database. Applicant has not defined these terms within the disclosure nor has an association between first database and a second databases been defined as being equivalent to a source database and a target database within the disclosure. Applicant's drawing also do not depict this element.

Applicant's argument regarding the limitation migrating data or the migration process is not convincing. Applicant uses an example from a patent not cited in this Application to prove that the use of the term migrating is not needed in the body of a claim is irrelevant to the present invention. Also, Applicant has made a mistake is citing that the example claim does not use the term migrating in the body of the claim because at line 10 the claim states "migration rules". The claim is vague because while the preamble cites migrating data in the preamble Applicant has not specified the migration of data within the body of the claim. The examiner has pointed out that the missing steps appear to be the migration process implemented by database migratory 510 figure 5A.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
